

BEAVERTAIL

Beavertail Boat Blind Extension Instructions

PARTS LIST

Item #	Qty	Description
1.	4	7" blind extension poles
2.	8	1/4" x 1 1/4" bolt
3.	8	1/4" nylock nuts

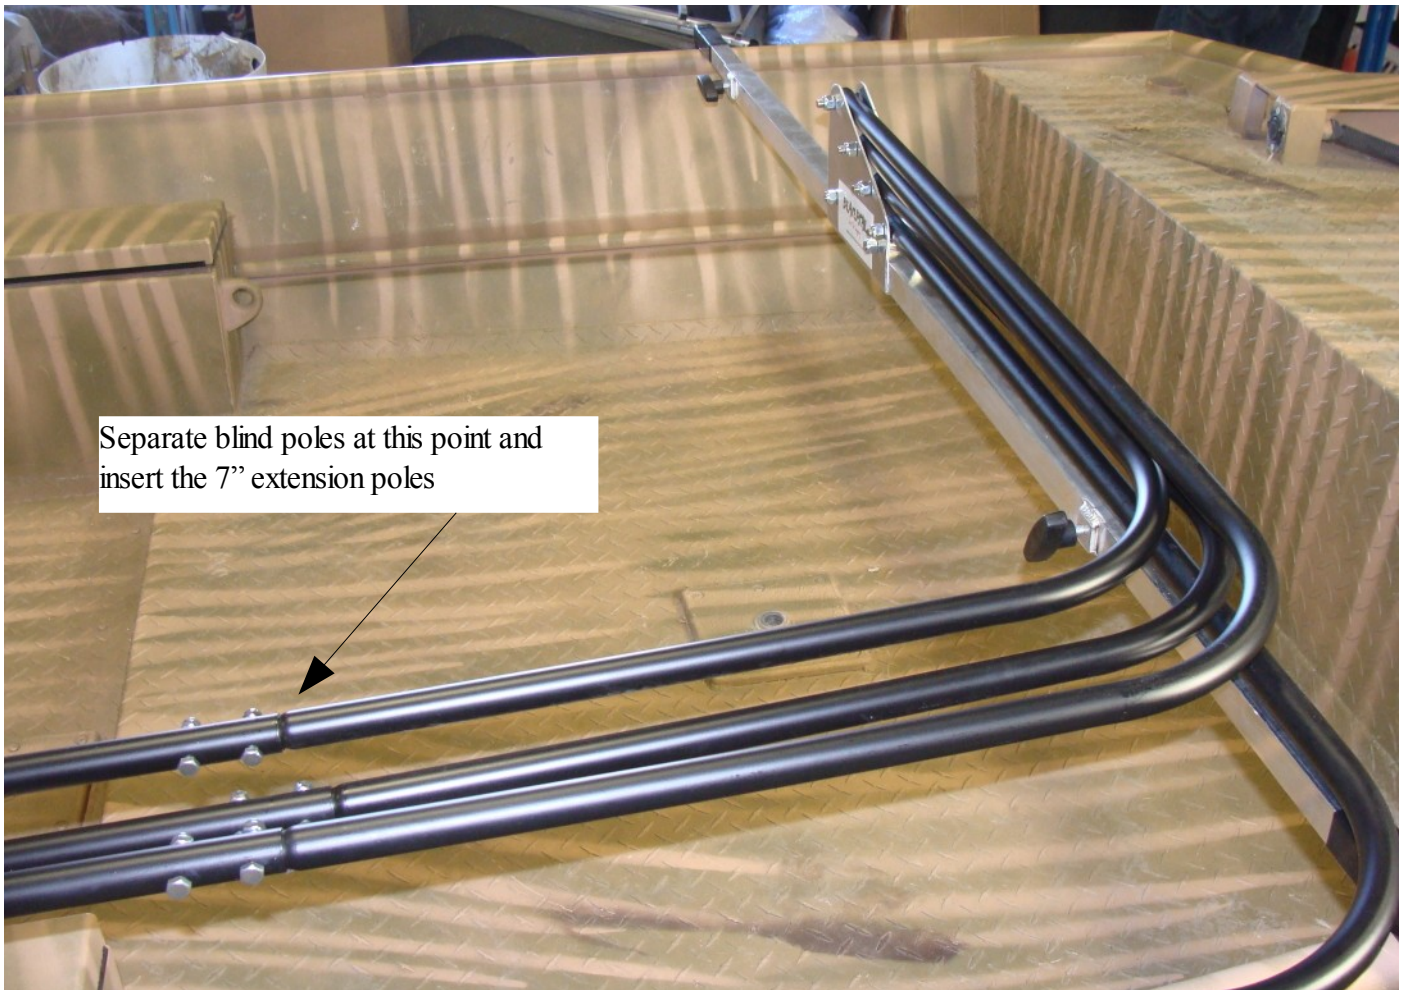

Tools required

Ratchet

7/16" socket

7/16" wrench

1. Move blind material out of the way so the elbows and straight center sections are clear and visible. Separate boat blind straight center sections from the boat blind elbows. Do one pole at a time and install 7" extension as shown below so the poles do not get mixed up.

2. Insert the four extension poles in between the straight center sections and the elbows making sure to line up the holes. Tighten securely using the $\frac{1}{4}$ x 1 $\frac{1}{4}$ " bolts.

3. Slide the blind over the extension poles and over the elbows.
